# PULRON 101FL & 101ES SERIES

Pulron powder coatings are preferred for a wide range of applications, from **pergola systems to pool coatings and various construction projects**, due to their durability and aesthetic appeal. With superior quality, they extend the lifespan of structures while providing aesthetic and functional solutions that add value to projects.

## Key Benefits

**Ultimate corrosion resistance:** Long-term corrosion protection against abrasive effects of salt, sea water, sand and sun.

**Fully UV resistant:** Attractive, colour-stable finish that lasts for decades.

**Designed for marine and industrial applications:** Corresponds C5-M and C5-I category.

**Environmentally friendly:** No VOCs, no plasticisers, no isocyanates and free of TGIC, halogens, BPA and heavy metals

**Flexible:** Maintains flexibility even at - 60°C.

**Strong finish:** Impact and abrasion resistance.

**Repairable:** In the event of an unforeseen circumstance, our product can be repaired and will continue to maintain its superior durability.
