

ULTIMATE CORROSION PROTECTION

PIPELINES, VALVES, FITTINGS

**ULTIMATE
PROTECTION**

Pulron 101 Series provides ultimate corrosion and UV protection for;

- Valves
- Pipes
- Fittings
- Hydrants
- Tanks
- Modular Water Tanks
- Flanges
- Strainers
- Dismantling joints
- Pumping station
- Waste water treatment facilities

PRODUCT AT A GLANCE

Superior Coating Properties:

Fully UV resistance, attractive, color stable finish that lasts for decades.

Excellent corrosion resistance, long-term corrosion protection against abrasive effects of salt, sea water, sand and sun.

Corresponds C5-M and C5-I corrosion category.

Outstanding chemical resistance to water disinfection agents and chemicals present in wastewater.

Slow rate of growth mildew and fungus compared to other coatings.

Superior impact resistance.

Flexibility even at -60 °C.

Easy to Apply:

No primer is needed.

One step coating with superior adhesion.

Ideal solution for coating sharp edges and welded parts.

Easy repair of coating defects.

Environmentally Friendly:

Drinking water contact approval (WRAS)

No VOCs, no TGIC, no halogens

No plasticisers, no isocyanates, no heavy metals

No PVC, no phthalates

Certified water contact approvals to keep water quality

Product Brief Info

Film thickness	Min. 250 µm
Application Methods	Spraying, Fluidized Bed
Colors	Blue RAL 5005, Blue RAL 5017, Green RAL 6026, White RAL 9016, Red RAL 3020 Other colors upon request
Durability	More than 20 years
